

Loke Battle Mats®

The Dungeon Books of Battle Mats launch on Kickstarter 18 April

Attention Adventurers! An Endless Dungeon awaits!

The Dungeon, A pair of Books of Battle Mats presented as a set, is the new modular adventure map book release from Loke BattleMats. A unique product which combines easy storage and portability with up to an epic 2'x2' playing area and a endless number of map combination options.

The Dungeon is level and flat, so it plays just like one large map. Our wire bound format is the closest you can get to a traditional RPG Tabletop mat with all the advantages of a book as well. Just open & Roll!

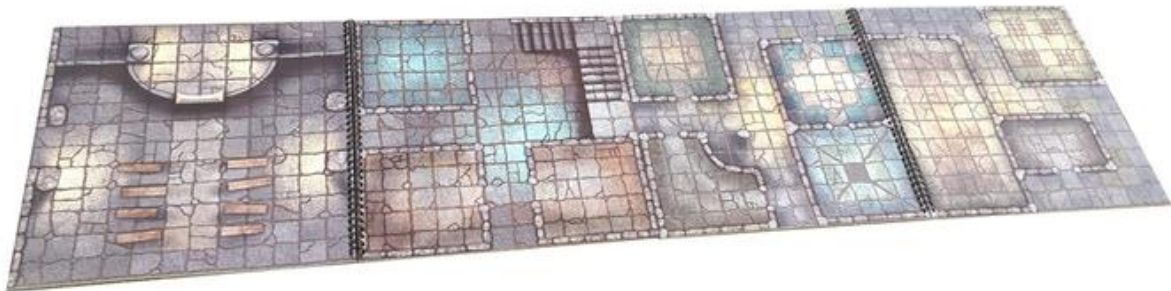

Fully Laminated throughout and thus wipe clean, every page bar the front & back covers is a map so you get the maximum dungeon out of the books! No more hastily drawing dungeons or spending hours preparing for games. Just open & roll for initiative!

Presented as a set, The Dungeon comprises two 12"x 12" Modular Books of Battle Mats designed to either create 1'x 1' or 1'x 2' maps using one book, or combine both books to form 2'x 2' playing areas, 1'x 4', or frankly any other combination you can think of. Designs have standard entry/exit points to allow the adventure to grow and grow.

Loke Battle Mats®

The wire bound spine allows the books to lay completely flat or fold completely in half. It also means you can ensure the books are 100% level, so your adventure can move seamlessly across the map.

The Dungeon, a Modular Book of Battle Mats set, features -

- Two Books presented as a set.
- Each book is 30 map pages (we will be increasing the page count as stretch goals are hit).
- Portable, adaptable, expandable and modular.
- Wipe Clean laminated pages of Dungeon themed Battle Maps for RPG encounters
- Wire Bound format, 360° spine offers unrivalled flexibility and lays completely flat.
- Linked designs & standard entry/exit points throughout to allow play across multiple pages and books seamlessly.
- 1-inch grid throughout.

Your dungeon adventure begins here!
